EDUCATION

Georgia Institute of Technology– College of Computing

August 2025 – Present

Bachelor of Science in Computer Science

GPA = 4.00/4.00

Relevant courses – Linear Algebra, Data Structures and Algorithms, Discrete Math, Multivariable Calculus

WORK EXPERIENCE

Mohammed Bin University of Artificial Intelligence (MBZUAI) & GenBio AI – Abu Dhabi, UAE

May 2026 – Present

AI Research Intern

- Developed an Biomedical Agentic Design architecture using **Claude Workflows + OpenClaw agentic ML pipelines** for BioXArena benchmarking tests, outperforming other agents by **~9% on average** across 76 domain tasks.
- Drove up to **~30% task-level score gains** through human-guided model selection, biological feature engineering, cross-validation, leakage prevention, and submission debugging.
- Currently authoring a **research paper** on the agentic AI workflow, experimental results, and human-in-the-loop design patterns for biomedical ML agents.

Undergraduate Researcher, Georgia Tech Sabra Lab - Atlanta, Georgia

January 2026 – May 2026

- Researched on autonomous BlueBoat navigation using monocular depth estimation for obstacle awareness and navigation.
- Evaluated **4+ SLAM models** including Apple Depth Pro, MiDaS, ORB-SLAM2, and ZoeDepth for Raspberry Pi 5 deployment.
- Supported a real-time perception pipeline with **YOLOv10, EKF sonar localization, and GTRI field tests every 1–2 weeks.**

Teaching Assistant - Atlanta, Georgia

January 2026 – May 2026

- Teaching Assistant for **Object-Oriented Programming in Java**, supporting **300+ students** through recitations and office hours.
- Guided students through core Java topics including OOP principles, generics, file I/O, debugging, and software design fundamentals.
- Contributed 200+ hours** grading assignments/exams, answering student questions, and helping improve understanding of Java programming concepts.

Emkay Global Financial Services Ltd – Mumbai, India

July 2025 – July 2025

Finance and Data Analytics Intern

- Analyzed **4+ equity markets** using **Python and the Bloomberg Terminal** to study cash, futures, and options delta correlations, improving **delta correlation accuracy by 30%.**
- Practiced options strategies including delta-neutral hedging, put-call parity, and volatility spreads to evaluate trading risk-reward.
- Utilized **real-time Bloomberg insights** to improve decision-making in equity and derivatives trading.

Reliance Jio – Remote

July 2024 – August 2024

Machine Learning Intern

- Developed a **Text-to-SQL LLM** that translated natural language into SQL queries and returned structured data from databases.
- Implemented **NLP pipelines using LangChain, Hugging Face, and Ollama**, integrating them with SQL and Python IDEs for seamless query generation; **improved query generation speed by 50% and accuracy by approximately 60%.**

National University of Singapore – Singapore

June 2023 – July 2023

AI & NLP Intern

- Implemented machine learning models (ANN, CNN, RNN, regression, clustering, decision trees) to solve predictive analytics tasks.
- Programmed and deployed chatbots using Amazon Lex and built face recognition solutions with Amazon Rekognition, improving accessibility in applications.
- Utilized predictive modelling techniques to forecast telecom customer churn up to 1.5 years and evaluated drivers influencing retention.

PROJECTS

Georgia Tech IOS Club- Atlanta, Georgia

January 2026 – May 2026

- Built a SwiftUI iOS app for birthday tracking and **AI-generated personalized messages.**
- Led a team project that **won GT iOS Club Demo Day Pitch Competition** for product execution and UX.
- Senior iOS Developer for **SideQuest, a SwiftUI + Firebase social adventure app** used by 100+ testers for completing real-world quests.
- Built 6+ core features including quest posting, collaborator flows, image uploads, feeds, profiles, and leaderboards.

LEADERSHIP AND INVOLVEMENT

Chess– Dubai, United Arab Emirates | Amritsar, India | Hyderabad, India | Atlanta, Georgia

April 2020 – Present

- Represented UAE Chess Team 2x in the CISCE National Games.
- Top 0.01% on the world's largest online platform in multiple time formats.

Publications– Dubai, United Arab Emirates

- [Securing Machine Learning: Understanding Adversarial Attacks and Bias Mitigation](#) - Analysed the vulnerability of AI Algorithms and their proneness to bias. September 2024

SKILLS AND CERTIFICATIONS

Skills: Python | C++ | SQL | Jinja | Flask | CSS | Langchain | HuggingFace | Ollama | Amazon Lex | Springboot | Swift UI | Claude | Openclaw

Certifications: What is Data Science? (IBM) | Introduction to Programming with Python- Harvard's CS50P | Introduction to Computer Science-Harvard's CS50X | Introduction to Artificial Intelligence- Harvard's CS50AI | Advanced MCP- Anthropic | Claude Code in Action- Anthropic
